

NUTRiFARM

Feeding the future

HEALTHY EQUINE

All natural high strength probiotic
blend for optimum equine
health and nutrition

Contains a massive 69 billion cfu's per 40 gram dose, including 5 strains of probiotic bacteria for immune function, 5 digestive enzymes for increased feed conversion and fibre utilisation plus active live dry yeast for improved digestion.

ANIMAL TREATMENT ONLY

Healthy Equine is sourced from premium quality ingredients that are formulated with very high active ingredient levels to have a significant impact on the health and nutrition of your horse.

NUTRIFARM

HEALTHY EQUINE

THE KEY INGREDIENTS

A blend of 5 micro-encapsulated bacteria: *Bacillus subtilis*, *Enterococcus faecium*, *Lactobacillus acidophilus*, *Bifidobacterium longum* and *Bifidobacterium thermophilum*.

These bacteria proliferate in the lower gastrointestinal (GI) tract. All mammals immune systems are strongly influenced by gut health. With daily use of Healthy Equine we have seen, from long term use, a strengthening of their natural defence systems so they are better able to cope in times of stress.

A specific strain of active live dry yeast: *Saccharomyces cerevisiae*. This yeast is a strong prebiotic and stimulates cellulose digesting bacteria, therefore improving fibre digestibility and microbial profile.

It also stimulates the bacteria that utilise lactic acid. This is why we have observed marked improvement in horses suffering from gastric ulcers and other digestive related conditions, including colic, with the use of Healthy Equine.

A blend of 5 digestive enzymes working on protein, starch, cellulose, fat and pectin.

These collectively lead to improved feed breakdown and increased surface area for the microbes to act on. This creates an environment resulting in more efficient feed utilisation and higher levels of available sugars and carbohydrates. In turn, this directly affects energy levels.

HEALTHY EQUINE IS 100% NATURAL AND CAN BE USED ON RACE DAY. THIS PRODUCT DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL.

ANIMAL TREATMENT ONLY

RESULTS OBSERVED BY EQUINE INDUSTRY PROFESSIONALS

Digestive improvement

Improved demeanour in horses with underlying digestive issues. They are more relaxed while being ridden and display improved performance.

Benefits to high grain diet

Tends to alleviate problems when feeding a high grain diet.

Improved feed consumption

Improves conversion efficiency so less hard feed is required to maintain horses. There is noticeably less manure in stables, indicating an improvement in the utilisation of feed consumed.

Immunity

Improves horse's immunity. Great when used during and after antibiotic treatment and sickness.

Coat condition

Improves coat condition and resilience to extremes of weather.

TESTIMONIALS

"Best product I have used to settle my horses and get rid of underlying gut problems."

"I had a horse that would suffer from colic when I was feeding him 6kg of oats per day. When I introduced Healthy Equine, the colic stopped and he was able to race again and was stronger than ever. I noticed a significant decrease in manure in the stables and all of my horses had more energy, which was noticeable on the training track and they showed greatly improved recovery times. This product takes away the worry and problems normally associated with feeding high performance horses."

"I only need one rug on my horses in winter, not two, and their coat condition stays beautiful."

"He's a different horse to ride, he's no longer tucked up."

DIRECTIONS FOR USE

40g per day for horses in work.
20g per day for ponies and spelling.

Ideal for use in conjunction with Healthy Equine BOOST Probiotic Paste.

STORAGE

Store below 30°C (room temperature) in a dry area out of direct sunlight.
